### Thoughtful Archaeology in the Ecosphere and Sociosphere

*15<sup>th</sup> International Conference on the History and Archaeology of Jordan*

Yarmouk University, Jordan 2022

### FIRST CIRCULAR

Conference dates: **2-5 August/ 2022**

**Dear Colleagues,**

The Department of Antiquities of Jordan and Yarmouk University are pleased to announce the *15<sup>th</sup> International Conference on the History and Archaeology of Jordan*, which will be held at Yarmouk University, Jordan, from 2-5 August 2022.

The ICHAJ, organized every three years, is an event of utmost importance for the scientific community of archaeologists and historians who, at an international level, are interested in Jordan, the Middle East, the Mediterranean and long-term Euro-Mediterranean cultural relations. The first ICHAJ was held in Oxford in 1980, as an initiative of HRH *Prince Hassan bin Talal*, one of the world's leading intellectuals of the Arab world, under whose patronage the conference continues to be organized.

Since 1980, the ICHAJ has been hosted in the major cultural capitals and the most important research institutes of the world. The Yarmouk University conference in August 2022 follows those of Florence (2019, University of Florence), Amman (2016, Princess Sumaya University), Berlin (2013, Humboldt Universitat), Paris (2010, University Paris- 1 Panthéon-Sorbonne) and Washington (2007, George Washington University).

As previously heralded by His Royal Highness Prince El-Hassan Bin Talal, the initiator and patron of this conference: “we need to create a continuum between the past, present and future, which extends beyond the narrow nationalism of the state perspective towards the Levant as a region, thereby potentially stabilizing the region and raising its profile”.

The great diversity of concepts and spectrum of cross-cultural experiences revealed through archaeology, in its broadest sense, can serve as a counter balance to polarization, retrenchment, and narrow nationalism. Archaeology aids us in illuminating history, celebrating regional interconnections, and understanding the myriad routes of ideas, which supersede boundaries. Current global and climatic ecological changes present a threat to the long-term well-being of humanity, but there is much to learn about attending such from the past. Meeting this sustainability challenge requires an all-inclusive interdisciplinary approach.

In honoring the centenary of Jordan, this conference also seeks to celebrate the collective leap of moving from stand-alone archaeological studies to a broader understanding of cultural heritage in its eco- and socio-contexts as an inherently multidisciplinary field.
